

Luminous facial

Vitalize, clear, repair and firm your skin!

Our Luminous Facial is the first complete, naturally advanced FDA approved skincare treatment that uses light therapy with topical skincare products and dietary supplements that work with the body's own natural processes to:

- Reduce fine lines, wrinkles and dark circles
- Clear and soothe problematic skin
- Create even skin tone and texture
- Purge and close clogged pores
- Provide immediate lifting and tightening
- Stimulate cellular renewal
- Lighten age and sun spots

Designed for facial rejuvenation, Luminous Facial therapy enables you to look younger and better without the pain or discomfort of surgery or injections.

Results are comparable to microdermabrasion, chemical peels, laser treatments and even botox, but at a more reasonable price and with no medical risk, side effects or down time.

I love using the Luminous Facial with the at-home products. After just one treatment, I began to see and feel a difference in my skin. Now I have friends tell me I've never looked better. I am using the repairing regime and I swear I look like I did 8 years ago.
