

# Velocity high pressure

The perfect glow is closer than you think!

Our High Pressure UV Therapy allows you to take your glow to the next level. Experience a healthy, refreshed glow as your entire body approaches new horizons in health and beauty. Achieve that sought after glow with our Velocity and experience benefits of UV therapy that include but are not limited to:

- Allow customers with light complexions to benefit from a glow
- Increased production of the brain's mood-lifting chemical, serotonin
- Maintain glow 3-4 times longer than basic UV therapy

Designed to help you look great and feel even better, researchers are finding that exposure to UV light has many positive psychological and physiological effects. Velocity also only requires 2-4 sessions a month to maintain a healthy glow.

Results are comparable to a day in the sun with less risk. We will help you make intelligent decisions involving UV therapy and continue to ensure you practice responsible skin wellness habits.

*I'm not a person who can tan normally, so I tried Planet Beach's Velocity bed based on the recommendation of a couple of friends who are members there. I've been very pleased with the results! The tan looks perfect and lasts for a good long while and as a member, I can go as often as I like! What a deal!*
